Una forma de observar la redirección puede ser desde las herramientas de desarrollo del navegador, en el apartado de red:

Pero más interesante aún es usar el comando wget http://sitioweb.martinez.dam/sanlucar desde la terminal. Desde aquí veremos claramente cómo al solicitar esa ubicación del sitio se recibe

una respuesta 302 (Found) que nos va a redirigir a la web https://www.sanlucardebarrameda.es/
